ABHISHEK KUMAR DUBEY

B.Tech Computer Science Graduate
Bhopal, Madhya Pradesh | +91-8349369757 | abhishekdubey3011@gmail.com | linkedin.com/in/abhishek

PROFESSIONAL SUMMARY

B.Tech Computer Science graduate with hands-on experience in Python, SQL, and web development (HTML, CSS, JavaScript, React.js, Node.js). Strong foundation in object-oriented programming, data structures, and database management systems. Built an automated student attendance and analytics system and a Python-based Retrieval-Augmented Generation (RAG) application for PDF question answering. Seeking an entry-level Software Engineer / IT role to apply programming skills, contribute to real-world projects, and grow as a developer.

EDUCATION

B.Tech in Computer Science and Engineering Nov 2022 – Jul 2026
Technocrats Institute of Technology (Excellence), Bhopal, M.P.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management Systems (DBMS)

Web Development: HTML, CSS, JavaScript, React.js, Node.js

Tools & Cloud: GitHub, VS Code, Microsoft Azure, Streamlit

PROJECTS

Automated Student Attendance Monitoring and Analytics System *HTML, CSS, JavaScript, Node.js, Express.js, MySQL*
GitHub

- Developed a web-based attendance management system to automate attendance recording and reduce manual data-entry errors.
- Implemented admin and student authentication, student management, bulk attendance marking, attendance history, and role-based access.
- Built an analytics dashboard to monitor attendance trends, identify students below the 75% threshold, and generate low-attendance alerts.
- Implemented Excel and PDF report generation for attendance records, along with a responsive interface for desktop and mobile use.

RAG-Based PDF Chat Application *Python, Streamlit, LangChain, FAISS, Google Gemini API, PyPDF*
GitHub

- Developed a Retrieval-Augmented Generation (RAG) based application that allows users to upload PDF documents and ask questions using natural language.
- Implemented PDF text extraction, document chunking, and Gemini embeddings to convert document content into searchable vector representations.
- Used FAISS vector similarity search to retrieve the most relevant Top-K document chunks for each user query.
- Integrated Google Gemini API to generate context-aware answers based on the retrieved PDF content.
- Built an interactive Streamlit interface with PDF upload, configurable chunking parameters, Top-K retrieval, and multi-turn chat functionality.

Vehicle Tracking System *Node.js, Express.js, MySQL, JavaScript, Google Maps API*
GitHub

- Developed a full-stack vehicle tracking dashboard to monitor vehicle locations, speed, and status in real time.
- Implemented Node.js and Express.js REST APIs for vehicle management, location updates, and tracking history.
- Integrated Google Maps JavaScript API to display vehicle locations using interactive map markers.
- Designed a MySQL database to store vehicle details and location history with relational data management.
- Implemented simulated vehicle movement to demonstrate dynamic location and status updates.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)

ACHIEVEMENTS

- Earned a Bronze badge on CodeChef through consistent participation in rated contests.
- Received a T-shirt and diary as performance rewards from GeeksforGeeks for active participation and contribution.
- Earned a Java certification from HackerRank, demonstrating foundational proficiency in Java programming.
